Allauddin Khan, MD

Diplomate, American Board of Psychiatry and  
Neurology, Neurology,  
The American Board of Psychiatry and  
Neurology, Neurophysiology

Beth Ann Leaf, PA-C

Certified Physician Assistant

**Florida  
Medical  
Clinic**

**YOUR LIFE  
OUR SPECIALTY**

Welcome to the Department of Neurology at Florida Medical Clinic. We are dedicated to understand, treat and prevent illnesses that affect the brain and nervous system.

Our philosophy is to recognize our obligation for the compassionate care of our patients. We

appreciate your trust and encourage you to call us with any problems or concerns.

## Allauddin Khan, MD

Born in Pakistan, Dr. Khan received his residency training in Neurology, and his fellowship training in clinical Neurophysiology from the University of Wisconsin Hospital and Clinics. He began his own private practice in Milwaukee, Wisconsin in 1999 and relocated to the Tampa Bay area in 2004. Dr. Khan is a leader in the treatment of neurological disorders of the brain and nervous system. He is board certified by the American Board of Psychiatry and Neurology in Neurology and Clinical Neurophysiology.

## Beth Ann Leaf, PA-C

Beth Ann was raised in Florida but spent most of her adult life in Illinois. She received her Master of Health Sciences degree from the University of South Alabama and a Master of Science in Educational Administration from the Western Illinois University. Her medical interests include general neurology and patient education.

# Know the Warning Signs

Early detection is the key to preventing serious health problems. Regular, periodic physical exams can help diagnose kidney disease and other medical conditions at early, treatable stages.

If you are experiencing any of the following signs or symptoms, schedule an appointment with your physician. The only way to know the causes of your symptoms is to see your doctor.

- ★ Memory Impairment
- ★ Numbness and Tingling
- ★ Unsteady Gait
- ★ Tremors
- ★ Fatigue or Dizziness

## Diseases we treat in our office

- ★ **Alzheimer's Disease**
- ★ **Parkinson's Disease**
- ★ **Stroke**
- ★ **Neuropathic pain**
- ★ **Chronic Headache**
- ★ **Nerve and Muscle Diseases**

# Services we provide in our office

## Adult Neurology

is a branch of medicine dealing with disorders of the nervous system. Physicians specializing in the field of neurology are trained to diagnose, treat, and manage patients with neurological disorders.

**Electroencephalography (EEG)** is a test in which electrodes are placed on the scalp to measure electrical activity produced by the brain. A noninvasive, diagnostic technique, EEG records the electrical impulses produced by brain cell activity. An EEG reveals characteristic brain wave patterns that may assist in the diagnosis of particular neurologic conditions, such as seizure disorders, impaired consciousness, and brain lesions or tumors.

**Electromyography (EMG)** measures muscle response or electrical activity in response to a nerve's stimulation of the muscle. The test is used to help detect neuromuscular abnormalities.

**Nerve Conduction Neurology (NCV)** is a recording of electrical activity during stimulation of a nerve. It reveals how easily and quickly a nerve functions and evaluates the integrity of motor and sensory nerves.

**Therapeutic Botox** used to treat different focal spastic diseases and excessive muscle contractions, such as dystonias, spasms and twitches. The toxin causes a neuromuscular blockade by inhibiting the release of chemicals from the nerve endings.

## Before your visit

When you schedule your appointment we will ask you to provide important information that will help us evaluate your condition:

- \* A complete list of all medications
- \* All prior records including x-ray and MRI films
- \* Any and all records that refer to your condition

We encourage you to call our office to speak with our medical staff. We will assist you in locating these essential records. Please call **352.567.7364 in Dade City or 813.985.1000 for our Tampa and Wesley Chapel locations.**

## After Hours

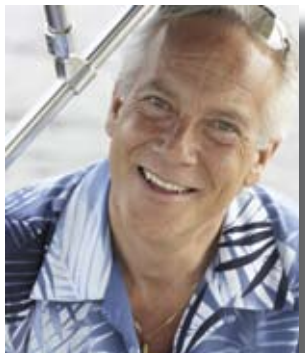

Please call 911 if you are in an emergency situation. If you need routine after hours assistance, call **352.567.7364 in Dade City or 813.985.1000 for our Tampa and Wesley Chapel locations** and our Neurology Department answering service will put you in contact with the on-call physician.

## Winter Residents

Our staff is available to you during your visits to Florida in the winter months. Should you need special assistance during your stay, please contact our office so we may assist you in receiving care while you are in Florida.

## Our Mission

We consider it an honor to care for patients. Our goal is to work together with you and your family to offer you the best possible medical and surgical care available.

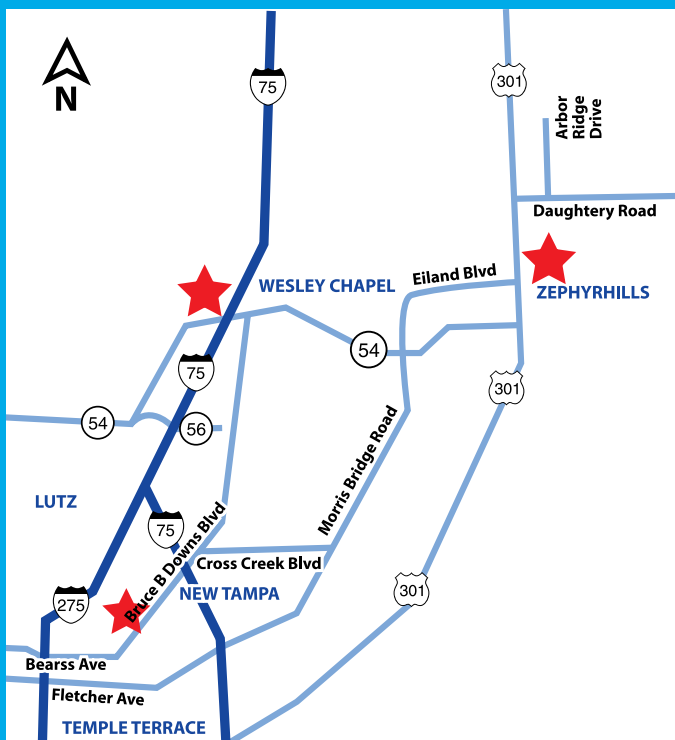

# What is Florida Medical Clinic?

Florida Medical Clinic is a nucleus of over 75 multi-specialty physicians, combined with more than 700 highly skilled nurses, medical professionals, and supplementary departments offering a network of medical support for our community. Our goal is to contribute to the well being of our patients while constantly evaluating how to improve what we do.

The ancillary departments self contained within our clinic are one of the most extensive support systems offered to patients in our area. These services include x-ray, ultrasound, mammography, nuclear medicine, CT, MRI, echo-cardiogram, stress testing, pulmonary function, optical, physical therapy, pharmacy, outpatient surgery, diagnostic laboratory, lipid clinic, and clinical research. Making these services available to our patients on site gives our physicians the opportunity to personally manage your healthcare, and saves our patients time and money by providing these services in the same location as the doctor. Plus, if your needs are urgent, these on site services enable us to respond quickly if necessary.

## Our physician specialties include:

- |                     |                                    |
|---------------------|------------------------------------|
| Allergy & Asthma    | Ophthalmology                      |
| Anesthesiology      | Orthopaedics                       |
| Cardiology          | Pathology                          |
| Dermatology         | Physical Medicine & Rehabilitation |
| Family Practice     | Psychiatry                         |
| Gastroenterology    | Pulmonology                        |
| General Surgery     | Radiology                          |
| Hematology/Oncology | Rheumatology                       |
| Hospital Medicine   | Sleep Disorders                    |
